A. Introduction:

A.1 University:

Higher Institute of Computer Science and Communication Technologies of Hammam Sousse “I.S.I.T.C.O.M” was established in August 2001 by Decree No. 1912/2001 dated August 14, 2001.

Partnerships:

A.2 Intern:

Name: Mohamed Amine Selmi

Phone number: 23057592

Email address: MohamedAmineSelmi@outlook.com

A.3 Supervisor:

Name: Ajroud Amen

Phone number:

Email address: amen.ajroud.isitcom@gmail.com

B. Application Overview:

B.1 Challenges:

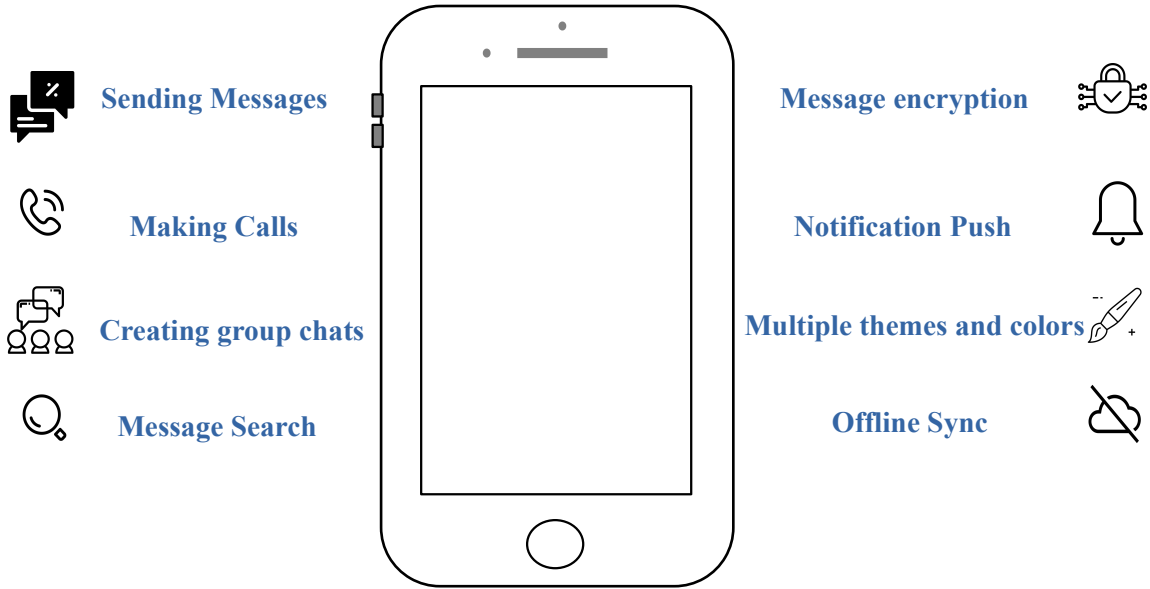

There exists multiple messaging apps, which create a problem of fragmented communication. This app seeks to provide users with a single platform to connect, share messages and stay in touch, avoiding the need to use multiple apps.

B.2 Objectives:

Creating a Mobile Application for user communication and message exchange. Through the App users can:

- Exchange messages: Text and Media.
- Perform audio and video calls.
- Receive real-time notifications.
- Invite Friends to form a group chat.

B.3 Technical specifications and features:

Type of Application:

Mobile application installed on a smartphone or tablet, tailored to each operating system and compatible with iOS and Android.

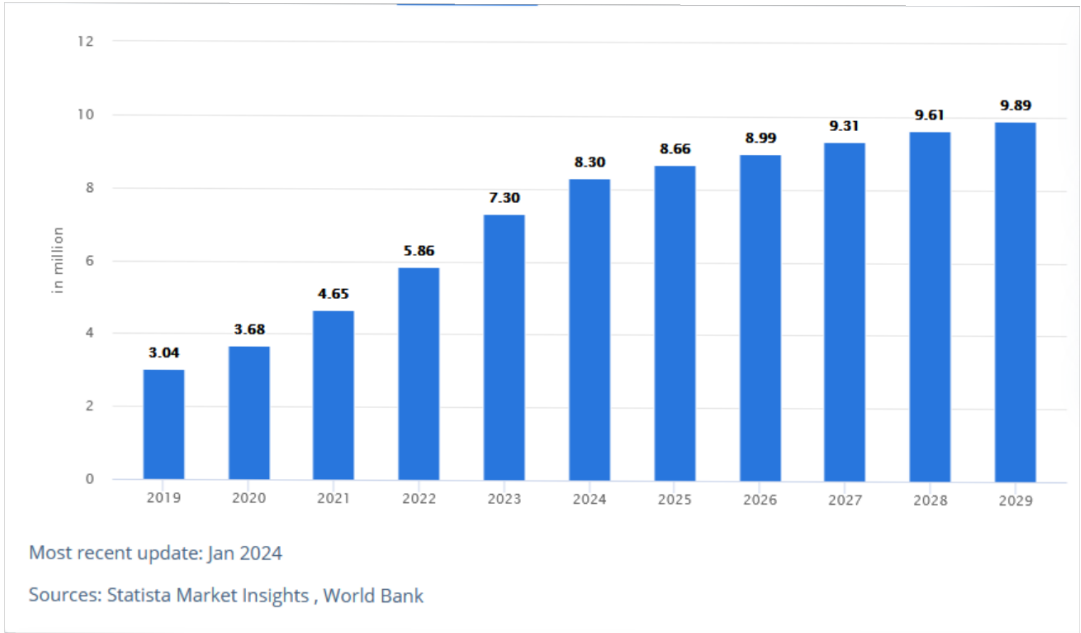

Application Availability:

The application should be available on the Google Play Store and the Apple Store to reach the widest audience possible.

Project Scope:

The application will be available in two languages: French and English.

B.4 Target audience:

This application is designed for public usage and only requires a mobile phone and internet connection . According to a World Bank study, The number of Tunisians satisfying those requirements is 9.89 million, 80% of the population.

C. Expected Deliverables:

C.1 Developing a mobile application:

Developing a mobile application that allows for instantaneous communication between users.

C.2 Working Environment:

- Laptop
- Mobile Phone
- Internet connection

C.2 Development Tools:

- Flutter
- Django
- Websocket /Socket.io
- Firebase/SQL
